## 4. Errores Detectados y Correcciones Aplicadas

---

No se registraron observaciones para este inventario.

## 5. Hallazgos Generales

---

- **Materias Primas** concentran el mayor faltante: almendra de cacao, polen, vainilla y maní representan el grueso de la diferencia.
- **Cajas de chocolate** (cód 412, 580) muestran sobrante significativo — posiblemente stock recibido no registrado en Effi.
- **Productos en Proceso** (nibs, coberturas) presentan faltantes importantes — posible consumo en producción no registrado.
- **Etiquetas** (cód 90) con -852 unidades de diferencia — probable consumo acumulado sin registro.
- **Bodega Desarrollo:** stock en 0. No requiere traslado.
- **8 artículos** aún no tienen costo manual asignado en Effi (sin stock físico, no afectan valorización).
- **Productos No Conformes:** 12 artículos por valor de \$228.720.

## 6. Ajustes Recomendados y Próximos Pasos

---

- Generar ajuste de inventario en Effi para alinear stock del sistema con el conteo físico.
- Investigar las 20 inconsistencias críticas antes de ajustar — algunas pueden ser errores de registro corregibles.
- Asignar costo manual a los 8 artículos que aún no lo tienen.
- Definir destino de los productos no conformes (disposición, reproceso o baja).
- Implementar inventarios parciales periódicos (semanal por categoría o quincenal por valor ABC).
- Este informe se aprueba como **nueva línea base** del inventario.
